Thanks to **Jennifer Huser** for getting this published.

Documents TX187.169 to TX187.159 are the additional support documents for this proposed rule.

Document TX185.158 is today's Federal Register.

For the new staff, this is a rare Region 6 proposed rule with proposed amendatory language. The proposed amendatory language begins on page 84 FR 61858.

I made several mistakes in this docket – this is the reason the last digits of the Deese TX187.xxx numbers are not the always same as the document ID numbers.

As always, contact me if you have any questions about this docket or any other Region 6 FDMS or Regulations.gov docket. Bill, x7253
